

Spare parts
for earthmoving
and mining equipment

Company presentation

BYG manufactures and distributes spare parts for earthmoving, mining and construction machinery

We produce highly engineered products that exceed OEM's specifications. **ISO 9001 certification** ensures high quality products and a reliable service. Range includes 2 brand names:

BYG Products: Cutting Edges, Blades, Bucket Lips, Ripper Shanks, High Strength Fasteners 12.9, Direct Replacement Teeth, Adapters, Cast Wear Parts, Tungsten Carbide Cutting Tools & Hydraulic Breaker Tools. Production with the best cast steel alloys to ensure optimum performance, more wear material and extended life of products

Futura wear technology Products: Teeth, Adapters and Cast Bucket Protection Wear Parts feature innovative designs of proven performance. Futura product range combines the best steel alloys for tough impact & abrasive applications with extra wear material designs to extend wear life in every application.

Subsidiaries in USA, Canada, France, Germany, Portugal, India, China, Russia, Nigeria, Singapore and a wide number of well known distributors worldwide.

40+ years of experience and a growing worldwide network allow us to service all global locations in a short time at very competitive prices. We are able to quickly develop and produce customer's own designs & prototypes.

Online system available to obtain instant quotes and availability of products.

If you wish to receive brochures or catalogs, please do not hesitate to contact us. It will be a pleasure to be of assistance to your quotations, product knowledge, logistic requirements, technical or engineering support.

Our commitment is to SATISFY your needs and meet your PROFIT goals. The whole BYG team works for you.

Yours sincerely,

The BYG Team
