

PRENSOLAND, S.A. was established in Aiguafreda (BARCELONA) in 1.959.

From the outset, the Company has continually expanded its production capacity, using its own technology and designing new machinery and equipment, to meet the ever demanding requirements of the precast concrete industry.

Our products, by their quality and service, have contributed to the expansion of the ever important concrete prefabrication sector. Together with our continued interest for improvement it has assisted in the large scale construction of municipal housing, private homes, apartments and factories throughout the World.

This constant desire for improvement has enabled us to produce new equipment, methods of manufacture and systems for the most extensive growth in the future.

The continuity of effort between producers and users of our machines and equipment has encouraged PRENSOLAND, S.A. to grow and develop new technologies over the past years. It has enabled us to supply our many customers with the most suitable equipment for their specific requirements. With over 50 years of uninterrupted operation, our COMPACTA and TENSYLAND moulding machines, vouch for the quality of our products and the reliability of our systems.

PRENSOLAND, S.A. has exported machinery all over the world: South America, Africa, The Middle East, South East Asia and Europe. In addition to the numerous plants in Spain, we can also provide references for production units in France, Great Britain, Italy, Portugal, Ireland, Russia, South Africa, Brasil, Mexico, Argentina, Belgium, Thailand and many other Countries.

We are responsible for more than 1500 highly productive plants operating in more than 30 Countries spread over four Continents.

Our lead in the world market has been possible due to:

- The proven strength of our machines and equipment, which permits the depreciation period to be extended.
- The versatility of our equipment which enables different products to be made with the same machine.
- Our after-sales service, supported by a large stock of spare parts, which are readily available, if required.
- Our commercial, technical, maintenance and assembly staff.

The TENSYLAND process comprises various machines and auxiliary equipments for production of prestressed elements, such as hollow and solid slabs, beams, terrace units, TT slabs, etc.

The COMPACTA machines and installations for production of precast concrete units, such as blocks, pavers, kerb stones, etc, offer all type of solutions and automatic equipment to meet every user need.

Once more, Prensoland will be exhibiting in next BAUMA 2013 Edition, which will take place in Munich from the 15th to the 21st of April 2013.

We would be really glad to meet you at our Stand nr. 308 located in Hall B1.
