

## TECHNOLOGY FOR PRESTRESSED CONCRETE

---

I would like to present our company called **Exclusivas Resimart Ibérica, S.L.**, (from now on **Resimart**) which is located in Chiva (Valencia) Spain, whose objective is to **develop and manufacture technological equipment for the production of prestressed concrete elements (Installations and Machinery for prestressed concrete elements)**. Also offers technical solutions for the construction and assembling production tracks and ancillary equipment.

We would like to inform you that **Resimart**, is a **31- years experienced company in making technological equipment for the production of prestressed concrete elements**, from the design to the operational.

We remind you that we are manufacturers and installers of complete turnkey lines for precast concrete, specializing mainly in precast prestressed concrete by **Vibro-compresión Technology and Extrusion Technology (First Spanish Manufacturer on develop this Technology)**.

Nowadays, **Resimart** is established as one of the leading providers of integrated lines for the prestressed concrete. Our machinery is working at full capacity in more than 250 installations in Spain, Portugal, Russia, Ukraine and Morocco.

Our aim is to satisfy the necessities of our customers with a large variety and high quality of machinery for the manufacture of prestressed concrete . Furthermore, **we can produce under project**. Please, **enter in our web [www.resimart.com](http://www.resimart.com)** and see our **products, services and possibilities**.

Yours faithfully,

Borja Tarín Doménech
